2024/0819/P	P J White	26/05/2024 12:36:58	COMMNT	<p>I see that the applicant has had pre-application advice for this installation. Why is the report on this advice not available to the public in the website documents?</p> <p>Is there going to be any lighting on the installation as it states 'prelit' in the description in the website documents?</p> <p>Any lighting here would be inappropriate and invasive.</p>
2024/0819/P	Mal Parker	25/05/2024 17:13:51	OBJ	<p>1 Trammels the understated and restrained nature of the architecture of the JW3 Centre, and detracts from the core cultural centre that it was set up to be.</p> <p>2 Provides a powerful visual distraction to drivers heading northwards along the arterial Finchley Road, and for those crossing from Arkwright to go westwards along Lymington Road - the issue of road safety is also germane, given the inevitable distraction of drivers of something of this scale.</p> <p>3 Whilst the initial claim is that the display will be 'artwork' this does not constrain, given the application to make the support structure permanent, the quality or purpose of any following display on the framework.</p> <p>4 Does not prevent future applications to illuminate, either by external or internal sources, thereby creating a massive pollution of the visual nature of the adjacent Redington and Frognal Conservation area immediately on the other side of Finchley Road.</p> <p>5 Over-shadows the glorious Camden Arts Centre building on the opposite corner, Listed as Grade 1.</p>
