

Dear Mr Versluys,

I am writing with respect to the planning application in relation to the positioning of a shipping container at 38/40 Windmill Street W1T 2BE. I am a resident of the third floor of 5, 10 Windmill Street W1T 2JE that overlooks the address of the application.

As you will appreciate, there were no drawings or associated documents attached to the application. This obviously makes it very hard to assess precisely any direct visual impact associated with the container. However, it is hard to imagine that unless it was to be located at ground floor level within the premises, a container could be sited at the address in question without it being highly visibly intrusive to residents and neighbours on the street, including myself. On this basis, I am writing to object to the application in the strongest possible terms. Moreover, I really do not think Windmill Street which is predominantly residential in use and character and part of a conservation area is at all appropriate for locating a shipping container.

Do feel free to contact me if you require any further information from me.

Yours sincerely,

Alexander Jan (Mr)
Flat 5, 10 Windmill Street
