2024/1973/P	Kim Field	10/06/2024 09:39:14	OBJ	<p>The proposal will fundamentally spoil the look of the gorgeous run of villas along Wilmot Place. 9 Wilmot Place is in a very visible position from Rochester Terrace Gardens, and is directly centred in line with the view along Rochester Terrace. The Rochester Conservation Area was set up specifically to prevent this kind of development, and there is a specific clause protecting the roofline of those houses. I strongly object to the proposal.</p> <p>Separately, I notice that the architects have been intentionally misleading in their proposal by illustrating an existing mansard on 8 Wilmot Place.</p>
2024/1973/P	Christopher Jones	09/06/2024 19:03:29	OBJ	<p>I object strongly to this application because the new mansard addition will destroy the homogeneity of this early Victorian row of semi detached houses built in 1846, which are part of the Conservation area. What is more, as the proposed addition is on just one side of this house, it will be a complete eyesore!</p> <p>On 8th November 2001 an article by Tony Palmer was published in the Camden New entitled " Past preserved for the future" specifically mentioning this street and has a photo showing these buildings which include no 9 Wilmot Place. He clearly considered that this was of historical importance.</p>
