

Application No:	Consultees Name:	Received:	Comment:	Response:
2024/2174/T	Dr Olga Sobolev	19/06/2024 23:39:06	JUST	<p>The application indicates that the trees will be 'reduced back no further than previous points of reduction.' This is quite vague regarding the intended work and poses a risk to trees currently under a protection order. I am pointing this out because the last application approved in that area, 2023/2011/T, resulted in another lime tree being drastically reduced to what is now essentially a stump.</p> <p>The lime trees are a valuable amenity. They are essential for the environment, providing much-needed clean air and offering an attractive view for residents and nearby flat owners.</p> <p>I therefore have serious concerns about this proposal and would object to the works before the degree of the reduction is specified (e.g. % of the current size).</p>
