

Application No:	Consultees Name:	Received:	Comment:	Response:
2024/1274/P	Cecilia McAnulty	18/06/2024 13:21:30	COMNOT	Dear Sirs. I am a resident of an adjoining street. One of the characteristics which makes this an attractive area is its gardens and greenery. Consenting to an application which allows gardens to be razed and replaced by large structures (we are not talking garden sheds) is that it opens the floodgates to other developers to do likewise. I respectfully ask that you decline this application
2024/1274/P	Jana Harrison	15/06/2024 12:56:55	INT	The drawings for the proposed outbuilding in the rear garden to be erected show it to be of a height and size incompatible with the space and the previous use of the space. The size implies the building is to be used as more than a garden shed. This brings forth the idea that the previously quiet garden will now be used for louder activities and the foot traffic to and from this building will create noise not previously experienced. It proposed structure abuts the surrounding properties in a way that will greatly impact the privacy of the houses along the garden privacy. It appears to include removing/replacing the fencing of these surrounding properties which is unacceptable and implies that the building will reach to our fencing. It includes the removal of 8 trees which provide privacy to the neighbouring properties.
2024/1274/P	Nicola Lacey	16/06/2024 23:06:39	COMMNT	Please, please do not allow more mature trees to be destroyed in the conservation area. Especially when the original plans promised to respect them. These plans will significantly affect the amenity of the area, and of the abutting houses.
