Application to fell turkey oak at 10 Park Village West - please register my strong objection

Thank you for consulting me on this application. This is a magnificent tree, unusual in this area, and a rich habitat for wildlife - a pair of thrushes usually nest in it.*

There may be some rot in the trunk but this is not a convincing reason for felling it. The likelihood that such an otherwise strong and healthy tree would fall onto the house is surely very small.

I note that in an application for tree work at 10 Park Village West made as recently as January 2023 - 2023/0086/T - nothing as drastic as felling is proposed, though a 'possible compromised stem' is mentioned.

Hero Granger-Taylor, 22 Park Village East, NW1 7PZ

*This tree and the thrushes are well known to me because for a year - from February 2022 to February 22 - I lived opposite at 17 Park Village West, while my own house was being repaired following an insurance claim.
