2024/0452/P	Mike Beary	22/06/2024 13:09:59	COMMNT	<p>Parliament Hill is a tributary of the Fleet River and is prone to flooding. Hence the two recently installed soakaway in the street. This swimming pool development interferes with the underground water movement and will lead to an increase the flooding of South End Green which is becoming a major problem. There are no flood water containment vessels in the design of this swimming pool. Therefore it will cause increased flooding risk as the climate changes. Already the local establishments such as the curry paradise are being flooded about three times per year. This development needs serious modification.</p> <p>Mike Beary South End Green Association</p>
2024/0452/P	L Rankin	23/06/2024 22:43:33	OBJ	<p>I'm very concerned about the basement excavation causing damage to our building. We have had a long history of subsidence, but none of the 4 owners at number 30 have provided surveyors with information about this or allowed anyone on-site for an inspection. So I'm not sure how an accurate risk assessment for number 30 has been made. I'm also concerned about the extraction of fumes from the pool and noise from the pump room close to people's bedrooms</p>
