Product details

Product information

The modernist shape of the Aqua Tower rainwater tank will successfully fit into the modern architecture of the house. This water container is not only a water supply for plants on the plot, but is also a decoration of the garden. The tank is equipped with a top opening with a lid and four threaded holes for a tap or a quick-connector for mounting a garden hose.

Features and benefits

- Capacity: 350L Depth: 38cm Width: 77.5 cm Height: 135cm
- Connection kit, 13 pieces 3/4" male thread
- Rainwater supply and drainage system collected in the tank. The set is enriched with an external filter that filters the water entering the tank. Complete and universal set, simple construction ensures quick assembly. The composition of the connection set, 13-piece ICANS7:
 - tap, hose connector quick coupler connector, hose spout, spout handle, hose (water gauge), holesaw, catcher connections, reducer, reducer, catcher, external filter, black collector hose Connector color black
