NOTE: REFER TO COST CONSULTANTS INFORMATION REGARDING AREAS

Rev	Date	Description
00	30/11/2023	FOR PLANNING

Do not scale. Use figured dimensions only. All dimensions to be checked on site. All drawings to be read in conjunction with the engineers' drawings. Any discrepancies between consultants drawings to be reported to the architect before any work commences. The contractor's attention is drawn to the Health & Safety matters identified in the Health & Safety plan as being potentially hazardous. These items should not be considered as a complete and final list. The work package contractor's normal Health & Safety obligations still apply when undertaking constructional operations both on and off site.

Notes:  
All FFLs have been measured relative to the ground floor level of the Furnival Street building, which has been assigned a value of '00.00m'. Note this does not relate to Ordnance Datum levels at this stage.  
Geometry shown for the tunnels and associated above ground structures is taken from the point cloud survey, with a tolerance of +50mm at this stage.  
Geometry shown is not to be relied upon for determining the external extent of below ground structures, as this has not been determined at this stage.  
Alignment of tunnel geometry with OS Map data is approximate at this stage, and is subject to more accurate survey data in future.

These items should not be considered as a complete and final list. The work package contractor's normal Health & Safety obligations still apply when undertaking constructional operations both on and off site.

**Notes:**

All FFLs have been measured relative to the ground floor level of the Furnival Street building, which has been assigned a value of '00.00m'. Note this does not relate to Ordnance Datum levels at this stage.

Geometry shown for the tunnels and associated above ground structures is taken from the point cloud survey, with a tolerance of ±50mm at this stage.

Geometry shown is not to be relied upon for determining the external extent of below ground structures, as this has not been determined at this stage.

Alignment of tunnel geometry with OS Map data is approximate at this stage, and is subject to more accurate survey data in future.

**Notes:**  
Do not scale. Use figured dimensions only. All dimensions to be checked on site. All drawings to be read in conjunction with the engineers' drawings.  
Any discrepancies between consultants drawings to be reported to the architect before any work commences. The contractor's attention is drawn to the Health & Safety matters identified in the Health & Safety plan as being potentially hazardous. These items should not be considered as a complete and final list. The work package contractor's normal Health & Safety obligations still apply when undertaking constructional operations both on and off site.

**Notes:**  
All FFLs have been measured relative to the ground floor level of the Funnell Street building, which has been assigned a value of '00.00m'. Note this does not relate to Ordnance Datum levels at this stage.  
Geometry shown for the tunnels and associated above ground structures is taken from the point cloud survey, with a tolerance of +/- 50mm at this stage.
