2024/2517/P	Alan Selwyn	09/07/2024 00:42:58	OBJ	<p>The Belsize Society objects to this application:</p> <p>Insufficient details given. Though unclear it appears the original window design is being replaced by an inappropriate design and type. The limited drawings do not indicate the windows in the context of the whole elevation, which is vital in determining this application. They do indicate significant architectural value in the existing fenestrations with multiple small high level panes over casements which appear to relate to the windows above and to similar examples in the street. The proposed large uninterrupted glazed units appear disproportionate, modern and unrelated to the windows above and appear inappropriate in relation to the limited area of the existing building shown. There is no detailing of the design of the new units. Due to the lack of information and the apparently damaging changes to this building's main street elevation in the conservation area this application should be refused.</p>
