Information about the proposed use(s)

Select the use class that relates to the proposed use.

C3 - Dwellinghouses

Is the proposed operation or use

- ☒ Permanent
☐ Temporary

Why do you consider that a Lawful Development Certificate should be granted for this proposal?

All proposed works are internal to improve energy efficiency.

Glazing improvements from single to double will not alter exterior appearance; none of the proposed works will affect the building's exterior appearance.

Double glazing - will enhance the energy efficiency of the building by reducing heat loss in winter and keeping interiors cooler in summer. This will also contribute to a more comfortable living space with consistent indoor temperatures.

Cavity wall insulation - Installing cavity wall insulation will improve the thermal efficiency of the building, keeping the homes warmer in winter and cooler in summer. Reducing the workload on heating and cooling systems, thus a reduction in energy consumption, will result in lower utility bills. Additional benefits also include: the stabilising of indoor temperatures, enhancing year-round comfort and the reduced risk of damp and mold, promoting healthier living conditions.

Flat roof insulation - Adding insulation to the flat roof to improve the thermal efficiency of the building and lower energy bills as heating systems are used more efficiently. The insulation will also help prevent moisture intrusion, which can damage the roof structure and lead to costly repairs, ultimately extending the lifespan of the roof.

Please refer to the supporting documents for more detailed information of the proposed works.
