

STATEMENT

I hereby submit this statement to justify the necessity of installing an air conditioning unit at our existing café at 39 Brecknock Road, London, N7 0BT.

Our attempt to use stand-alone air condition units proved to be insufficient, as the venue's temperature rose above 25 degrees on hotter days. This led to the unfortunate necessity of shutting down the venue twice last week due to excessive heat, rendering our coffee machine and sandwich grill inoperable at such high temperatures. Our staff members even reported feeling dizzy while working in these conditions, prompting an immediate closure of the venue to seek alternative solutions. We firmly believe that the installation of a proper air conditioning system will effectively address and resolve these issues, ensuring a comfortable environment for both our staff and customers.

Best,

Robert Hunningher
