Subject: 14 DOWNSHIRE HILL LONDON NW3 1NR -- PROPOSED TREE WORKS

Dear Sir / Madam

We write in connection with a protected *salix* tree in the relatively small rear garden of the above property.

You will see from the attached photographs that the trunk has collapsed and is lying horizontally on the ground with its branches spreading accordingly in all directions. The tree continues to grow but has overwhelmed the adjacent lawn area.

Our client wishes to seek consent to remove the tree altogether as it is now a deformed specimen of its species and replace it with an agreed alternative more appropriate to its location.

A brief meeting on site might be helpful in seeking your view on the likelihood of consent being forthcoming – and I shall be grateful for your early response as our client is additionally concerned at the Health and Safety aspects of the tree's branches.

Your earliest response will be appreciated.

Thanks +

Kind regards.

Daniel
