## Description of Proposed Works

Please describe the proposals to alter, extend or demolish the listed building(s)

In order to improve the airborne sound insulation performance, it is proposed that the plasterboard which is currently fixed to the underside of the timber joists that form the ceiling of the basement flat are to be removed. The existing joists cannot be removed therefore resilient bars are to be fixed to the underside of the existing floor joists with 38mm square timber battens fixed underneath running at 90 degrees to the existing joists. A secondary layer of resilient bars are then to be fixed to the underside of the battens, with two layers of 15mm Soundbloc plasterboard fixed underneath to create a new ceiling. A sketch of this has been included in the application.
