2024/3063/T	Wendy Levitt	02/08/2024 15:55:18	OBJ	<p>I object to the felling of this outstandingly beautiful tree which I overlook directly from my house. A haven for birds, bees and squirrels, it contributes substantially to the corridor of gardens between Edis Street and Princess Road - a rare environmental amenity at this time of threat from climate change. it also significantly reduces overlooking between houses built so closely together.</p> <p>The notification of its felling comes very soon after the earlier notification which Camden overturned in November 2023, not finding it to be contributing to significant cracking.</p> <p>I would like to know how much the situation has changed in that period of time and why the usual methods of remedying any cracking seem not been tried.</p>
2024/3063/T	K Siva	04/08/2024 18:13:17	OBJ	<p>I object to the removal of this tree. Removing this tree would considerably change the privacy screen between my house (35 Princess) and the houses on Edis Street. Since the fig tree was removed, the Acer is even more important as a green corridor running through our neighbourhood.</p>
2024/3063/T	Daniel J Stillit	02/08/2024 17:39:22	COMMNT	<p>Hello,</p> <p>My family and I live at 39 Princess Road and our house partially faces this beautiful tree. It should not be destroyed on environmental grounds and for the terrible impact it will have on us. In particular my daughter, Sophie-Blaise, who has a chronic illness (under the care of UCLH), spends much time in the shade of this tree. There is a shortage of trees in the vicinity and the TPO should be respected.</p> <p>Thank you.</p> <p>Daniel Stillit and family</p>
