2024/3079/P	Kim Roper	12/08/2024 16:03:52	OBJ	<p>I live at the rear of the applicant's property.</p> <p>The rear of our property is close to the corner where the applicant wishes to position the heat pump.</p> <p>I object to the applicant's positioning of their heat pump.</p> <p>There is potential for noise pollution due to proximity. Research shows that heat pumps have potential to cause consistent noticeable noise, especially during colder days when they have to work harder to draw in heat from outside.</p> <p>I assume this may be a reason why the applicant wants the heat pump installed in a position that is far away from their own building. To reduce disturbance to the quiet enjoyment of their home.</p> <p>Likewise, those of us in this building (especially on the ground floor) would prefer not to have our peace disturbed.</p> <p>Therefore, the heat pump should not be placed closer to our property, and an alternate suitable position farther away from our home should be planned.</p>
