

Please may I hear from you urgently

For the avoidance of doubt I object to the application

I consider it puts at risk both Mansfield place and the Giles building

Subject: 2024/2995/L Flat 1 Giles Building Proposed basement works

FAO Jaspreet Chana

Dear Ms Chana

I am the owner of 5 Mansfield place.NW3 1HS. Mansfield place is adjacent to the Giles building as it is now called. I received a flier advising me of the applicaiotn and possible severe consequences for Mansfield place from the development. I have not received any letter from the council concerning it.

I have looked at the website and see 'constraints' such as possible contamination of the land from hospital use and problems of disturbing subterranean water flows and slope stability. These refer to a 2010 Arup report which perhaps could be forwarded ?

I cannot see the drawings so please can you provide the appropriate link.

I have seen the objection from flat 3 which is a strong one. I cannot see the reports referred to which are disturbing if correctly summarised.

I am concerned at this development and wish urgently to have all drawings and reports made available so I can assess it in time for the closing date for objections. In the absence of such drawings and reports in time please treat this email as an objection to the application

Kind regards

John Hales MBE
