

Dear Sir/Madam,

I am writing with additional information regarding an objection to planning application 2024/3480/P.

Points have been raised via the official website, but the website does not offer the option to attach files, which will be useful in understanding the discrepancies raised.

The text submitted has been repeated below, but also find attached the drawings and photo, in question, that do not display the west wall of 12 Solent correctly. The files attached show where windows for 12 Solent Road have been omitted in the files submitted as part of the planning application of 14 Solent Road.

Repeated text:

In response to application number: 2024/3480/P (14 Solent Road NW6 1TU) I raise the following objection. Drawings, and a photo, have been submitted that do not represent the windows on the west facing wall of 12 Solent Road. In fact in one photo, the windows have been removed all together. The west facing wall is the area of our property that is impacted by the roof extension, as the extension will block light. In order for the planning department to make a decision all the documents need to be true and accurate and at the moment this is not the case.

I have listed below the documents, and file name of images, where windows to 12 Solent Road windows are missing.

Document: **1759 14 Solent Rd AD 0001 3D Renders Rev A.pdf**

- At 12 Solent Road, on the west facing wall, at the second floor level, there is a window. This window is not presented at all in the drawing.

Document: [1759 14 Solent Rd AD 3000 Existing Elevations Rev C.pdf](#)

- 3D View 2_Existing - Again, the window at 12 Solent Road, west facing wall at the second floor height, is not represented in the drawing.
- Photo depicting: IMAGES OF EXISTING - NORTH ELEVATION LOOKING AT 14 SOLENT RD WITH 10 & 12 SOLENT RD TO THE LEFT AND 16, 18 & 20 SOLENT RD TO THE RIGHT. All the windows on the west facing wall at the first and second floors have been removed from the photo. The west facing wall is shown as having no windows at all. There are in fact three windows, two on the first floor and one on the second floor.

Document: **1759 14 Solent Rd AD 3001 Proposed Elevations Rev B.pdf**
