

Design and Access Statement

57 Lissenden Mansions, Lissenden Gardens, NW5 1PR

23 August 2024

This application relates to the retention and upgrading of existing painted timber framed French doors to the rear of the above ground floor flat.

The existing doors were installed circa 20 years ago and the double glazed units have poor thermal performance. We seek to replace the double glazed units with more thermally efficient units. The existing doors and frame will be retained and there will be no change in appearance. The French doors are not visible from the public domain.

The existing doors

All flats on the upper levels have French doors in this location – also shown on our elevation drawings
