Thank you, Ewan.

I appreciate transport planners looking at general considerations, but the need for bus with wheelchair lift to pullover in the proximity of level access entrance of the Ashley Court at all times is very specific. They cannot make U turn on Frogal Lane, they need to have passage through with a pullover space for embarking and disembarking.

Please ensure this specific point is considered.

Kind regards,

Ana

Hi Steve/Ana

Hope you are both well and thanks for emailing, apologies I have not replied sooner, I have just come back from leave today.

Ana, thank you for responding and I have contacted our technical team who will upload this as an objection and therefore will be considered as part of the planning assessment.

It seems like the developer has carried out some online consultation process that has implied this however this is not what the Council has suggested. Our advice is actually uploaded on the application's webpage within the pre-application report.

In terms of the transport implications, we have a dedicated team of transport planners assessing applications like these.

Hope this helps

Kind regards

Ewan Campbell
