Dear Sirs,

I have studied the proposal in detail and have concluded that the above development would greatly improve the Finchley Road end of Frognal Lane.

I do not see how it would take light from the block on the corner as the development is located to the north of it.

The development would harmonise the residential feeling of the well looked after red brick buildings and leafy gardens.

The RedFrog society tries to help keep the residential feeling and architecture intakt and this development in my opinion would be in line with those ideas.

I look forward to a change of this messy garage situation at the entrance of this otherwise so beautiful street.

Sincerely yours,

F Leonhard
