2024/3073/P	Federica Casaluci & Chiara Garelli	05/09/2024 22:08:52	OBJ	We would like to object to this plan as ventilation ducts will cause noise disturbance. We are already badly affected by the duct at n. 151 which passes right next to my living room window and force me to keep windows closed until late when they finally switch it off as the noise and vibration is very disturbing. There is also a number of rear gardens and terraces that will be impacted by the noise of this additional duct. The installation process will cause loss of privacy and daylight and most importantly it seems that due to the limited space in the back of the building the duct will not only be installed right next to and around the first floor bedroom window but also in front of my window on the third floor blocking light, view and creating more noise and long-term distress to all of us residents.
