2024/3750/T	Roger Low	05/09/2024 12:52:50	SUPPRT	The Horse Chestnut (T1) is clearly diseased. One look at the leaves is sufficient to see disease. We are neighbours and see the disease spreading through the tree. We are concerned that disease will spread to our trees and to those of other neighbours. We are only disappointed that it has taken so long for approval for removal of this tree to be given. Please act promptly to approve removal so that the risk of spread of disease ended.
