

Application No:	Consultees Name:	Received:	Comment:	Response:
2024/0769/P	Paul Syrysko	09/09/2024 09:27:53	OBJ	<p>I note the revision to planning to assuage concerns over visual impact.</p> <p>However, I feel the folding approach will not help as working teams will soon "forget" to fold this away and the structure will thus be left permanently raised.</p> <p>In our adjacent property we installed a discreet man-safe anchor system precisely to avoid such visual blight to our neighbours.</p>

2024/0769/P	Camden Town Conservation Area Advisory Committee	09/09/2024 19:27:49	OBJ	<p>The revised proposal is not acceptable as the guard rail will not get folded down after use. It would not be possible to enforce folding down, therefore the proposal does not mitigate the negative impacts we have identified previously.</p> <p>Please refer to our comments regarding the previous retrospective application for a guardrail for details of what these impacts are.</p> <p>As there is a suitable alternative: namely a fall arrest system, addressing the same safety concerns and actually providing safe maintenance access to the parapets beyond the railings, there is no reason for not adopting a safer and cheaper solution.</p> <p>The CTCAAC objects to this application.</p>
