Response:

what about the local wildlife - we have owls, bats and foxes whose lives will also be destroyed by months of noise, dust/pollution and disruption. The road is simply too narrow and the local traffic system too delicately balanced to accommodate this amount of construction traffic over a prolonged period. Indeed the proposed access solution is a veritable horror-show! The recent Bridget Jones filming was problematic and that was only for a few days. These works will continue for months and probably years (like a previous refurb on Christchurch Hill and a current project on Flask Walk).

Finally, the Sequoia CMP document is inaccurate - you will not be consulting with the Grove Place TRA as it hasn't existed for a number of years now!
