

Typical plants plug planted into substrate as 9cm plants into green roof substrate over drainage mat

Rosmarinus prostratus
 Erigeron karvinskianus
 Thymus sperphyllum
 Lavandula munstead
 Vinca minor Gertrude Jekyll
 Sedum species

Typical build up for planting green roof Over bin store. Allow for 150mm of substrate over 20mm rootdrain or similar. A drainage outlet from the planter is necessary to prevent water building up and becoming flooded in extreme rainfall
