

Good afternoon , As an owner of a flat in [8 hampstead hill gardens](#) which is adjacent to [8 a Hampstead hill gardens](#)

I was very surprised that out of the blue I was informed work would soon commence on the rear of 8a

Converting the existing garage into living accommodation with a garden above - all of which had not been

Previously permitted when the original planning application was made over a year ago .

Can you say how, without prior consultation with all the owners who lived in hampstead hill gardens

And who without exception objected to this development ,suddenly this work is proceeding when Camden

Planning had previously not agreed to it .

This work will be detrimental to ourselves , will detract from the privacy of lower flats in [no 8 hampstead hill gardens](#)

When completed , whilst of course causing further nuisance and excessive noise , apart from the risks

To the foundations of [8 hampstead hill gardens](#) which was one of the reasons we objected to it in the first place

I do not understand how this work, formerly not permitted by camden planning , has just been given the go ahead without

Anyone who objected to it being informed .

I would appreciate an explanation .

regds
