

Hello

I'd like to object to the plan to built a vent at 153 Fortess Road. I am one of the residents of flat 1 and think it would have a big impact on my living space. The plans don't indicate exactly where the vent will go but at the moment it seems likely it will go through the first floor terrace. In the application it says no residential garden space will be lost, but this is my garden space!

I see there has been noise mitigation taken into consideration however it will block light from my bedroom, and also spoil my view. Currently the view from the bedroom is of my garden and I can see trees behind - and I don't want a whopping great air vent in the way all of a sudden.

We have lived happily here for years and don't want a vent built right through our garden. The other restaurants on the street that have vents pass through empty space - not people's terraces, and it doesn't seem fair that that should be allowed to happen, just because the new cafe owner wants to change the business, I don't see why we should have to suffer.

Best,
Zoë x
