2024/4221/T	Stavros Danaos	20/10/2024 13:52:23	APP	<p>My concern about the removal/reduction of this cherished tree on Goldhurst Terrace is shared by many on this street, who also feel that the balance between urban development, insurance policies, and green spaces is often skewed. The fact that the tree offers both ecological and social benefits—shade, privacy, a habitat for birds—emphasizes the importance of preserving urban greenery.</p> <p>It's frustrating to see so many trees removed based on insurance companies' blanket policies, often with little evidence that they pose any real threat to structures or drainage systems. Trees are essential for urban biodiversity, combating climate change, improving air quality, and enhancing mental well-being.</p> <p>We do NOT want the removal of this tree.</p>
