Importance: High

Planning Reference: 2024/4405/T

I would like to object in the **strongest possible terms** to the proposed felling and loss of these two important mature trees in the large green space bounded by Albert Street North, Parkway, Arlington Road and Delancey Street.

1. **Both species of these mature trees are Category A carbon credit trees which are in good health, located within a conservation area and are listed.**
2. **Over 45 houses and flats have a view of these trees and their contribution to the beauty and peace of this area and their value as a public visual and health amenity cannot be overstated.**
3. **They are an integral part of the green oasis at the back of our homes which provide an essential habitat for birds and insects which make an essential contribution to the biodiversity of this area as well as providing some protection from air pollution.**
4. **There is no new evidence to suggest that these trees are a danger since the refusal to approve the first planning request to remove these trees.**

We urge you to refuse this planning request to cut down the trees.

Regards

Russell Grant

30, Delancey Street,

London NW1 7NH
