

Dear sirs / planning officer Gary Wong

We would greatly appreciate confirmation of receipt of this objection email.

On behalf of 51 Ornan Road, Martyn and Sonja Wenzel, we wish to put in a strong objection to this planning application.

Reasons:

1) the rear side proposal, directly impacts light to windows in 51 Ornan Road that are directly facing. The previous rear roof terrace did this and at the time Camden stated it was an oversight for not consulting us upon our complaint regarding the distance from our directly facing windows. This has materially impacted light to these directly facing windows. This is known to the applicant. The distance to the facing windows of 51 Ornan Road is within the tolerance to validate an objection. The proposal extends / increases the impact of the previous "roof terrace" and we strongly object to it.

As a separate note, Sonja and Martyn Wenzel are elderly and largely housebound. This proposal is likely to have a material impact especially given the history.

There is no social or economic value to this extension due to the house already being a large single family house.

On behalf of Martyn and Sonja Wenzel we would appreciate both confirmation of objection and a point of contact in this regard.

Kind regards

Greg Wenzel, Martyn Wenzel, Sonja Wenzel
