Other (please specify):

Electrical Cabinet

Existing materials and finishes:

the existing materials used are within the telephone box next door and is cable and a small plastic box which turns the supply on and off. These are housed in a metal covered area within the curtilage of the phone box. I have been informed this is a non-metered supply which does not take up very much room. i have also been informed that the metered supply requires a thicker cable, most likely the same box for turning the supply on and off and also the meter itself. This all needs a small cabinet - the size of which is to be determined by yourselves and UKPN.

Proposed materials and finishes:

A Torbette - GRP Cabinet made by <https://www.envicoengineering.com/product/torbette/> Other suppliers including <https://www.enclosure-shop.co.uk/collections/grp-cabinets> have many smaller sizes also. The materials used are a metal cabinet and the colour can be to any specification. i could match the red of the telephone box to match the look and feel of the site or blend in with a green cabinet to match the trees or keep to the standard black cabinet around the corner which is vandalised! The cabinet will be locked at all times unless for inspection or installation.
