2024/4311/P	B. Bennett	13/12/2024 10:40:11	OBJ	<p>Dear Jaspreet Chana</p> <p>I am writing to object to this proposal. This would take away even more office use in this area of already highly intense residential use. This puts an added burden on local services/ waste removal/ street cleaning etc. Further use of the basement of this building for a flat would also be inappropriate due to the dark, congested conditions. Although the office has a kitchenette at present, use for residential living with possible intensive cooking etc, conditions are not appropriate and could be dangerous in such a small confined area. The office also has a bathroom at present but already two bathrooms have been put into the ground floor above. This suggests extreme densely populated conditions in just two floors of this small building. The proposed windows at the front are not appropriate for this traditional 19th century Camden conservation area building. This would not only damage the original wall and appearance at the front but also could take away from the structural safety.</p>
