Condition(s) - Variation/Removal

Please state why you wish the condition(s) to be removed or changed

This application proposes altering the roof's material and design to improve maintenance efficiency. The green roof will be replaced with a standing seam metal roof due to technical challenges associated with warranties and ongoing upkeep. Additionally, certain windows have been reduced, as advised, to mitigate overheating.

1. The green roof requires maintenance at least twice a year. This raises issues re. CDM 2015 regulations. Balustrading around the roof has specifically been ruled in the planning permission, as granted.
2. The green roof substrate would require numerous mechanical fixings through the roof membrane, to keep the turf in place and stop this from sliding down the slope. This seems a very precarious way of building a roof. Warranty providers are understandably nervous.
3. Without the substantial roof build up, heights and the roof silhouette can be reduced. This reduces the impact of the development, most notably on Royal College Street where our eave line and the neighbour's roof now align.

If you wish the existing condition to be changed, please state how you wish the condition to be varied

The conditions for the green roof have already been approved. However, we propose replacing the green roof with a standing seam metal roof and creating a service area to facilitate maintenance.
