Dear Camden Council,

We're sorry for the late sending of these comments - we're aware the comments window closed two days ago.

We want to strongly register concern about the application as it stands. We live at 56 Gloucester Crescent, and there will be clearly lightblocking concerns for some of our front windows. We do not understand why this structure needs to be so tall. Not only will it impact light on the streets behind it, but it will also be a major visual discrepancy with the surrounding streets - especially one with as much historic significance as Gloucester Crescent. Its height will mean it is visible from many parts of the street, in an area that is significantly not marked by largescale buildings. We therefore wish the Council to consider at least amending the plans as they stand, to create a building with much less detrimental effect on the surrounding area.

With best wishes

Adam Thirlwell and Alison Macdonald
