2024/5494/P	Harriet King	03/01/2025 13:00:32	SUPC	<p>I support the application but would prefer to see the elegant steel columns exposed where the balcony is open (as in Flats 9-24 ref 2015/1422/P).</p> <p>Raising the outside entrance level to match the inside and making new, easier steps from the service road will significantly improve access for ambulant disabled.</p> <p>The external length of the proposed enclosures (2.85m externally) is greater than many of the existing enclosures, which vary in size considerably. The majority of the enclosures are shorter in length than the concrete slabs they are built on: for example the concrete slabs for 33/35/37/39 are 2.6m long, with enclosures shorter than this (2.1m to 2.4m). In my opinion, the overall external length of the proposed enclosures should preferably be reduced, for instance to 2.4m, to approximate to an average of the existing enclosures and to be less dominating.</p>
