I have just accessed this planning application and while it has many merits I am concerned about the build up (6 storey's I believe) and out towards Stacey Street. It will all but obliterate the light to my home (1a Phoenix Street) and I am very concerned.

Do the new storey's have to come so far over to that side of the building? It is a huge increase in floor space and a huge block in front of our building.

Additionally, while the pedestrianisation of Stacey Streey will make a huge positive impact, please can we have an allocated parking space nearby for service vehicles (plumbers/electricians etc) and delivery vehicles to use, in recompense for loss of convenience of vehicular access.

Please let us know
