2024/5131/P	Peggy.F	07/01/2025 17:42:06	OBJ	<p>This is an objection to this application I live in Langdon House to the rear of this development and it does not appear to have been considered at anytime.</p> <p>This block consists of 11 floors and is extremely close to the rear roof where a plant is being installed. The additional extension will be noisy, block lighting and what is currently a clear view of London thus reducing property valuation. The terrace will also be in ear shot of our flats of which some are elderly, vulnerable residents and children. A terrace that's accessible until 9pm is going to cause disruption and noise for residents.</p> <p>I would like this application re-reviewed in light of our residential building.</p>
