Description of the Proposal

Please note in regard to:

- **Fire Statements** - From 1 August 2021, planning applications for buildings of over 18 metres (or 7 stories) tall containing more than one dwelling will require a 'Fire Statement' for the application to be considered valid. There are some exemptions. [View government planning guidance on fire statements](#) or [access the fire statement template and guidance](#).
- **Permission In Principle** - If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.
- **Public Service Infrastructure** - From 1 August 2021, applications for certain public service infrastructure developments will be eligible for faster determination timeframes. See help for further details or [view government planning guidance on determination periods](#).

Description

Please describe details of the proposed development or works including details of proposals to alter, extend or demolish the listed building(s)

This application is supplementary to the previous application granted (2023/0282/P) for the retaining wall and balustrade works at Chester Terrace.

The application seeks permission to temporarily deconstruct 2 bays of the Outer Circle dwarf wall as part of an site access solution. This site access solution is an alternative for the solution previously granted as part of the full wall and balustrade replacement application.

The planning permission granted covered the access for the proposed construction site via the Chester Terrace carriageway. Planning permission is being sought to allow for an alternative means of access. The alternative means of access would be for construction traffic to access the site via the Outer Circle which is seen as less disruptive.

After completion of the works, the 2 dwarf walls would be re-constructed like-for-like to match existing.

Please provide a brief description of the building or part of the building you are proposing to demolish

The works propose to temporarily deconstruct 2 no. bays of a dwarf wall on the Outer Circle. The dwarf wall is a boundary between the Outer Circle Footpath and the Chester Terrace Gardens. The works are localised between the brick piers. The metal railings will be carefully removed and restored. The dwarf brickwork will be demolished. The brickwork will then be reinstated like-for-like.

Why is it necessary to demolish or extend (as applicable) all or part of the building(s) and or structure(s)?

The proposal is to temporarily deconstruct the dwarf wall to allow for construction traffic access from the Outer Circle into the Chester Terrace Gardens. This is seen as a less disruptive means of access onto the construction site for the granted "Chester Terrace Balustrade and Retaining Wall Works". Planning permission and listed building consent were granted for the reconstruction of the inner balustrade in August 2024. This included permission for a ramped access from the terrace carriageway down into the gardens for the proposed construction methodology. Since the original application, an alternative access method involving less disturbance has since been identified. This will minimise the impact on the fabric of the perimeter wall and cause less disturbance to residents during the 1st phase of the works.

The final construction methodology will be to the contractors' proposals – so access from the terrace carriageway may still be preferred by the contractor. However, in the interest of providing an alternative solution, that may be less disruptive to residents, a new planning permission and listed building consent is being applied for.

The alternative proposal, for which planning permission and listed building consent are now sought, involves the dismantling of two bays of the outer boundary wall to create a level access into the gardens from the Outer Circle. The existing brickwork and later post-war railing would be carefully removed and set aside in a secure location. The granite kerbs and York stone paving to the footway of the Outer Circle would be completely protected with reinforced sheeting capable of withstanding the passage of heavy vehicles. On completion of the works, the wall and railing would be reinstated to seamlessly match the appearance of the existing adjacent work. If any damage occurs to the kerbing or paving then these will be replaced with like-for-like granite kerbs or yorkstone pavers.

If a tree survey is required, this and the accompanying plan should be submitted alongside the application. The local planning authority should make clear on its website what the survey should contain, in accordance with the current 'BS5837: Trees in relation to design, demolition and construction - Recommendations'.

Biodiversity and Geological Conservation

Is there a reasonable likelihood of the following being affected adversely or conserved and enhanced within the application site, or on land adjacent to or near the application site?

To assist in answering this question correctly, please refer to the help text which provides guidance on determining if any important biodiversity or geological conservation features may be present or nearby; and whether they are likely to be affected by the proposals.

a) Protected and priority species

- Yes, on the development site
 Yes, on land adjacent to or near the proposed development
 No

b) Designated sites, important habitats or other biodiversity features

- Yes, on the development site
 Yes, on land adjacent to or near the proposed development
 No

c) Features of geological conservation importance

- Yes, on the development site
 Yes, on land adjacent to or near the proposed development

Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

[Find out more about biodiversity net gain, and access digital tools from our partners that can help determine if you are exempt, or produce the biodiversity metric information required.](#)

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- Yes
 No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

[You can use our partner's free online tool to determine if you are exempt and to produce detailed reasons](#)

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:

A biodiversity net gain exemption memo has been produced by Tim Moya Associates. This will be uploaded as part of the application documentation.

Note: Please read the help text for further information why developments may be exempt or not in scope.
