Breakdown of Works

Replication of Existing Stained Glass Panels

Our method of creating an insulated triple glazed future unit from new would generally be as follows:

- Customer provides accurate sizes images and specs required
- Artwork created for the design chosen in which customer can come in view, and amend colours if necessary
- Artist to be sent paintwork design to copy as per current original
- Once glass design and options approved and paintwork received from artist this will be then incorporated into our future units (triple glazed) to sizes and thickness provided by customer appropriate to fit new replica sash windows and doors
