2024/5130/P	tanita tikaram	21/01/2025 08:51:30	COMMNT	I'm a local resident who lives close to the telephone boxes , The charity sounds really interesting but there are more suitable and secure places in the community where work could be exhibited like the local library or community centre . Sadly, any art work displayed in the telephone boxes would soon become the target of vandalism . For example , the telephone boxes were recently re-painted and restored but it wasn't long before they were daubed with graffiti . I think the telephone boxes should be maintained as part of our local heritage , everyday I see a steady stream of tourists eager to take their photos next to them . Perhaps, the local community could take over ownership and the maintenance of them .
