2024/5777/P	Beata Nora Vida	23/01/2025 21:18:31	COMMNT	I helped Primavera recover from her first Hip Surgery in 2017, so I saw the before and after of the huge development in the back, and how it damaged Primavera's rear wall. Plus the difference in the natural light received in the rear of the house— especially the lower two floors. This application would further damage Primavera's amenity to live in the house and garden which was bought by her family around 1950. Therefore I strongly object to this application.
