Description of Proposed Works

Please describe the proposals to alter, extend or demolish the listed building(s)

To fit internal secondary glazing to the street-front windows of the 2nd floor, 3rd floor, and lower ground floor windows - these rooms are bedrooms and are effected by late night street noise. This would be sympathetically done with bespoke sash window secondary glazing, with the visual break along the current sash window line and done with the thinnest frame possible.

Has the development or work already been started without consent?

No

Also include the proposal for their replacement, including any new means of structural support, and state references for the plan(s)/drawing(s).

This 1820's listed terrace house has its original sash windows. I am preserving these windows - while improving the noise/heating/draft insulation of the rooms by adding sympathetic secondary glazing set internally into the casement of the current windows. From the street, and at a glance, the secondary glazing will not be visible. They will be made bespoke to the windows, and with the sash of the current window mirrored in the sash of the secondary glazing. This will not distract from the character of the building, and will not involve any alterations to the original windows, but will make it more liveable on a street where the nightclub Koko is open until 5am with a capacity of 1500 clubbers making significant noise throughout the night.
