Existing brick wall to be repaired repaired and made good in general, with materials, mortar and brick bond to match existing.

Timber trellis to sit adjacent to top portion of wall to create continuity with the rear trellis in wrapping the garden and to provide a structure for climbing plants. Trellis battens to be fixed to posts set offset from wall for minimal impact.

Existing feature retained and relocated to position shown

Flush metal edging

Paving forms edging to self binding gravel

Sliding doors to architects design

Acoustic enclosure as specified by engineer (non-ornamental)

Hardwood decking level with FFL

Planters on gravel surfacing over services. Moveable for access

Sandstone pavers as stepping stones with ground cover planting
