| 2024/5777/P            | Dimitrios Raikos        | 11/02/2025 20:04:50 | OBJ             | <p>To whom it concerns,</p> <p>My Name is Dimitrios Raikos,</p> <p>I am an Architect who has worked in Greece for over thirty years, creating more than two hundred and fifty spaces.</p> <p>After visiting 27 Oval Road today, I realized that the back lighting of the house is already obscured by the new rear development. Therefore, I think any further two floor development on the adjacent property would block the view, and the afternoon sunlight access to the lower floors of 27 Oval Road.</p> <p>The back garden spaces of the British London houses should be highly respected, as it has always lent a special amenity at the back of London houses with their gardens and trees, birds, foxes, and squirrels. If the so-called building development goes on, it will stop the natural life of those adjacent back gardens, which is part of the life and breath of the city.</p> <p>I hope you take into consideration all these arguments.</p> <p>Yours sincerely,</p> <p>Dimitrios Raikos, BA Honours Architecture, Post Graduate Diploma in Environmental and Energy Architecture at AA School of Architecture</p> |
