

Dear Madam or Sir

May I enquire about the permission granted Mrs Sarah Smith re:2022/3540/ back in 2022. As her neighbour at 60 we have no objections to the structure of the gym proper at the back of her garden but the roof appears to be very unreasonably designed and conceptually high and out of kilter with the rest of the flat-roofed structures around etc. causing great sight disruption to the garden area around the back of our house and beyond.

Others have also made comments and I am rather concerned because the owner of the other two flats in my house lives abroad and I don't know how he would respond to the structure.

I enquired through CRASH's Chair yesterday and they tell me that Tim Herbert Smith has done a check and established that permission was granted way back in 2022 - however, CRASH then objected to the application suggesting that the roof be flat rather than pitched (which it is at the moment) and in the process of being built. The design was subsequently revised to lower the height of the roof but I consider that the pitched design which is being built right now is not in the permission the Council actually granted.

I would like your team to investigate as it is disturbing and concerning. I appreciate that Mrs Smith believes she has permission but I feel there are misgivings and doubts not just from me but others who live nearby.

Please could I invite you to re-examine what is happening and if necessary attend the premises.

Many thanks,

Yvonne Klemperer
