

# Bike Storage

Single Bike Locker - 1 Bike\*\*

## SPACE SAVING BIKE LOCKER

An Asgard bike locker is the perfect way to lock away your "best" bike, keeping it both safe and dry. Designed as a space saving storage unit, a single bike locker is great if you are short of space outside and need to keep your bike locked up and out of sight. The single bike locker is accessed from the end so the width of the unit is kept to a minimum, making it ideal for down the side of a house or flat or anywhere where space is short.

Inside this heavy duty locker is a guide rail to hold your bike upright that can also be used as a 2nd locking point for increased security. This locker has been designed to be bolted to a concrete base, preventing any attempt to lift or carry the (15 stone) locker away. We also include a set of kit hooks so you can store your helmet or other cycling accessories together with your bike.

"I would recommend to anybody for bike storage or anything of any value!"

LL

"My bike storage arrived on time and took no time to install!"
