2024/4900/P	Nick Howard	17/02/2025 14:21:56	INT	<p>As the immediate neighbour I have concerns of the impact of the pool on what appears to be an underground river that flows through the back gardens on the East side of Daleham Gardens. Ever since the construction at 16 Daleham Gardens several years ago the back gardens (of 4, 6 and 8 Daleham Gardens) have gotten substantially wetter - particularly in winter. If the pool construction were to have a negative impact on the waterflow I would like to express my reservations. More detailed impact analysis is required than what I read in the impact analysis. I have discussed my concerns with Mr Bayers and I believe he understands my position.</p>
