2025/0524/P	Araxi Utidjian	17/02/2025 19:25:14	OBJ	<p>No 28 Parliament Hill is, naturally, given the name of the street, on a hill. The hill is made of clay soil, 'with movement'. As with any subterranean work on clay soil the proposed building of a pool under No 28 will increase the risk of subsidence in the area. The house is semidetached and shares a wall with the neighbouring house on its left side. It is otherwise surrounded by Victorian houses. Surely, it would make sense to leave the foundations of these homes as undisturbed as possible.</p> <p>The other point I'd like to make is that No 28 is within 20 minutes walk of the Men's, the Women's and the Mixed Ponds on the Heath. It's even closer to the Parliament Hill Lido. There's also an indoor swimming pool at the Royal Free just down the road. Is there anywhere else in London where swimmers are so well catered for?</p> <p>The construction work involved in this pool project will be considerably disruptive to many neighbours and potentially hazardous to their homes. For these reasons I am objecting to this proposal.</p>
2025/0524/P	Shari Donnenfeld	17/02/2025 15:31:16	PETITNOBJ E	<p>This is the third time I am objecting to the same application for a swimming pool. I fully object to the building of a swimming pool and find it deeply concerning. First of all, our foundations are clay and constantly shifting, secondly this will be at the top of a hill in an area that already has high water levels, some flooding and drainage issues both now and historically. Thirdly, there are already many places to swim in this area. This excavation along with the many extensions are now getting dangerous to the area. Please do not approve this pool.</p>
