I am writing to submit my concern about the quality of fixtures proposed for major works. Particularly, the very cheap option of film applied to glass for front doors. If this is the quality of materials suggested by the contractors the project will be a VERY expensive way of producing VERY poor results.

Additionally, back in May 2024 I was lead to believe that the windows had been chosen and were expensive due to the high quality of the product... but now it seems that nothing has been decided on, so how can we feel confident about the quality of the materials and works. I will also forward the reply I had from Michael O Sullivan back in May 2024 with responses to my specific queries.

Regards
Stella Willcocks
